

SUMMARY

Data Analytics professional with 5+ years building SQL reporting logic, Power BI semantic models, automated reporting workflows, and executive dashboards across insurance and operations analytics. Advanced SQL Server user experienced with CTEs, window functions, complex joins, and query optimization. Strong record translating business requirements into governed semantic models, reusable metric logic, metric validation, and decision-ready insights for C-suite and regional leaders.

CORE SKILLS

Analytics Engineering: semantic modeling, star schema / fact-dimension modeling, reusable metric logic, metric validation

SQL & BI Tools: advanced SQL (CTEs, window functions, complex joins, query optimization); SQL Server; Power BI semantic modeling (DAX, Power Query, Dataflows)

Governance & Documentation: Power BI access control (RLS, page-level access), PII handling, metric definitions, PBIX documentation

Modern Data Stack: familiar with Airflow, Git/GitHub, BigQuery, and Databricks fundamentals

Python Foundations: Jupyter Notebook, pandas, NumPy, Seaborn, Matplotlib

EXPERIENCE

PRUDENTIAL VIETNAM | Dec 2024 - Present

Vietnam arm of Prudential plc (UK), largest foreign-owned life insurer in Vietnam

Data Analytics and Insights Senior Specialist

- Built and maintained an analytics and reporting layer for Agency Distribution, enabling the CEO, Chief Agency Officer, and Sales Heads to monitor performance across 7,000+ agents and approximately USD 5M monthly New Business APE.
- Owned maintenance and enhancement of approximately 15 dashboards, including a complex Agency semantic model with 100+ source/model tables, supporting reliable executive and operational reporting.
- Designed semantic models for agency performance analytics, combining fact/dimension structures, reusable metric logic, advanced DAX, Power BI Service, and Dataflows.
- Developed an MA Recapture dashboard identifying approximately 30,000 policies approaching maturity for agent outreach, contributing to a 60% increase in retention rate versus the same period last year.
- Built AI-assisted workflows with GitHub Copilot and Power BI MCP to document PBIX models, review model logic, and improve metric validation, reducing turnaround from 5 days to 20 minutes.
- Partnered with business teams and Data Engineers to define metric logic and business rules for SQL transformations, while managing Power BI report access controls.

KONE VIETNAM | Jul 2021 - Jun 2024

Subsidiary of KONE Corporation (Finland), global elevator and escalator MNC operating in 60+ countries

Country S&OP Team Lead (Operations Analytics & BI) | Sep 2023 - Jun 2024

- Promoted to Team Lead in just over 2 years and served as analytical partner to the Operations Director across planning, forecasting, performance management, and leadership reporting.
- Owned end-to-end monthly 18-month revenue forecasting for Vietnam by modeling order book recognition timelines and sales pipeline conversion, helping leadership anticipate revenue gaps, workload peaks, resource needs, and procurement constraints.
- Built and scaled a Power BI S&OP and Operations reporting model from Vietnam to SEA countries and 4 APAC regions, standardizing regional KPI logic and leadership visibility.
- Supported approximately 600 billion VND revenue delivery in 2023 through recurring forecast reviews, variance analysis, and proactive business recommendations.

S&OP Specialist (Operations Analytics & BI) | Jul 2021 - Aug 2023

- Built KONE Vietnam's first Power BI utilization dashboard, driving a 28% increase in operative utilization rate and later adopted across 6 SEA countries as a regional best practice.
- Developed a resource planning analysis tool in Excel and Power Query to model manpower and equipment needs, saving USD 17,000 and cutting processing time by 80%.
- Converted manual planning and performance processes into repeatable Power Query and reporting workflows, improving data consistency, refresh reliability, and stakeholder self-service.

KEPPEL LAND VIETNAM | Feb 2019 - Jul 2021

Management Associate (Property & Project Management Rotations)

- Built Excel tracking tools for an 816-unit residential handover, adopted by a 9-person operations team.
- Served as primary liaison between customers, contractors, and internal stakeholders for defect rectification across 300+ high-rise apartments.

CERTIFICATIONS

Microsoft Power BI Desktop for Business Intelligence (2024)

Google Data Analytics Professional Certificate (2023) | Google Advanced Data Analytics Professional Certificate, in progress

Databricks Academy credentials (Fundamentals, AI/BI for Data Analysts, SQL Analytics)

CS50x - Introduction to Computer Science, Harvard University (2024)

EDUCATION

VNU-HCM - Ho Chi Minh City University of Technology (HCMUT) | Bachelor's Degree in Mechatronics Engineering (2018)
